Description:

NURGLAS tables are made from float glass bent at 800°C. This glass bending is technically demanding. The extreme temperature affects the appearance of the glass. An "orange-peel" surface or rainbow effects may well be seen. Finely frosted areas and small scratches, bubbles or dents are also unavoidable and cannot be regarded as a cause for complaint. All tables undergo a thorough quality inspection by experts and within strict limits. As this glass bending is a highly skilled manual operation, no two tables can be alike. Small dimensional deviations are possible. Please kindly consider these circumstances.

No special sizes, shapes and materials available!

Table	Table	Table
bent glass 10 mm clear	bent glass 10 mm clear white glass	bent glass 10 mm lacquered white glass (standard colors)
