

PEDRALI®

TOA TOA2

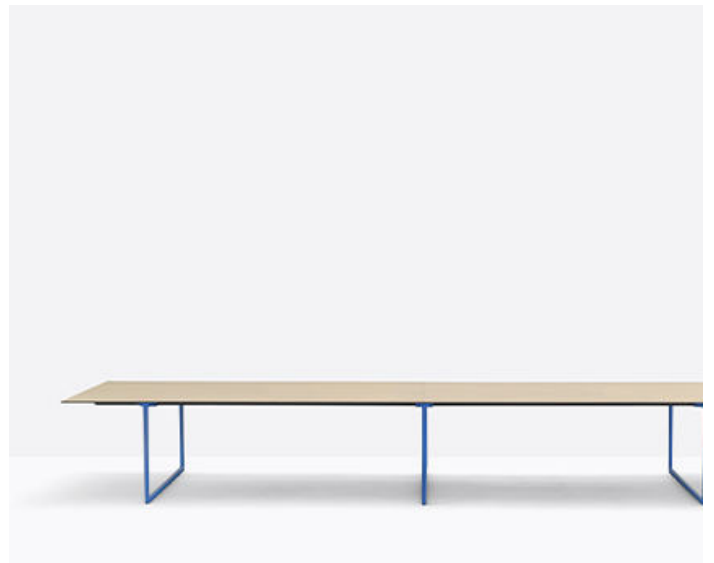

DESIGN:
ROBIN RIZZINI

The Toa table combines a technical-industrial style with decorative allure, giving life to a functional and evocative product. Lightweight and minimalist, it is characterised by a solid die-cast aluminium frame. The main features are its tapered bridge legs made of die-cast aluminium, which are thinner at the base and widen up towards the "T" element that supports the top. Toa table's endless modularity in length and width is the perfect choice for work spaces. In the largest version with three bridge legs, it serves as an efficient conference table in large board rooms.

Toa is available in a variety of widths and depths and in a wide range of finishes.
