## DESCRIPTION

37 Cube is a Led spotlight with extremely small dimensions ( $37 \times 37 \times 37 \mathrm{~mm}$ ) featuring a perfect balance between size and luminous flux: the device is visually out of the way, whilst all the attention is aimed at the lighting effects in the room. The body in extruded aluminium is completed by a translucent shell that receives the interchangeable lenses $\left(2 \times 7^{\circ} / 2 \times 10^{\circ}\right.$ / $2 \times 16^{\circ}$ ) and provides a diffused lighting effect. The minimalistic volumes breathe light into a new quality, from both the architectural and technical lighting standpoint as well as in terms of sustainability and savings. Adjustable by $358^{\circ}$ along the vertical axis and by $90^{\circ}$ along the horizontal axis, they provide accurate and effective accent lighting with only 7 Watts of used power. The extremely compact size of 37 Cube allows it to be installed semi-recessed into the ceiling, and together with the Algoritmo product line, as it can be completely housed inside the modules. Materials: body in extruded aluminium, screen / lens holder in satin-finish polycarbonate. Complies with EN62471, EN60598 and other specific standards.
