DESCRIPTION

Light, architectural space and natural landscape are the main elements of this project, based on principles of reduction of energy and materials.Through the dematerialization of volumes and mimetic transparency, and thanks to a slim recycled aluminium structure and methacrylate body, Mimesi does not hinder the vision, but silently integrates with the surrounding environment. When turned on it becomes a central element in the staging of people's lives, high lighting lumi- nous writing on the cortex of the light.
In the WHITE INTEGRALIS version, Artemide App compatible, Mimesi is designed to offer a white emission ensuring perfect perception while respecting the human presence and which at the same time combines control of microbial growth. It can vary in intensity and is available with a xed CCT of 5000K, with a high color rendering index (CRI 90).
