

ATMOSPHERA

**SOFAS**

## 9.zero set

Design by Atmosphaera Creative Lab

9.zero represents a modular seating system. The constructive simplicity of the 9 basic modules allows the creation of a vast number of compositional solutions to meet multiple needs of space and functionality. The structures are made of nine slats each nine centimeters in sanded and oiled Indonesian teak wood. The padding is made with draining rubbers, all covered with outdoor fabrics from the Atmosphaera collection.

Cover sheet available on request
