armature

An innovative fabrication process that manipulates both the temperature and the direction of air flow into blown glass. The result is a slightly distorted sphere with an interior landscape of satellite shapes, including an opaque milk glass diffuser that houses a LED lamp.

A steel armature system in a soft-touch matte black finish allows pre-composed branches to be easily connected to a series of hubs during installation. 28 series are available in 90 different colour ways making every fixture unique in form and composition
