

# Room

DESIGN BY  
HETTLER/TÜLLMANN  
2009

<sup>IT</sup> Difficile dimenticare la storia di questa lampada, disponibile anche in versione outdoor, divenuta capostipite di un trend, di recente diffusione, di mobili illuminati da esterno. La storia narra di una forma in polietilene dal disegno così irregolare da divenire iconico, di una luce pienamente diffusa da sembrare preziosa, di una seduta confortevole da non sembrare lampada. Room va vista, capita e ridisegnata all'interno di qualsiasi spazio ma soprattutto, va vissuta.

<sup>EN</sup> It is difficult to forget the history of this lamp, which also comes in an outdoor version. Its forefather has become a recently widespread outdoor-furniture trend. The product demonstrates a polyethylene shape with such an irregular design that it became iconic. Its fully diffused light seems special. It seems like a comfortable seat that does not look like a lamp. Room must be seen, understood and redesigned within any space, but above all you must try it.
